Music Boosters Donated $20,000 to the BOE to Pay For Upgrades in the Auditorium. Sincere appreciation to all our Music Boosters Donors who made this possible!

For those of you who did have the opportunity to attend the Spring Musical, you may have noticed a few changes to the sound system. At the February 2020 Board of Education Meeting, our donation of $20,000 for sound upgrades for the Auditorium was accepted. These upgrades included:

Wireless Replacement: Replaced Wireless microphones in the auditorium that we no longer compliant with FCC Guidelines. All of these microphones were used by the cast members of Rent.

Pit Mics - Recording Mics for all of the music concerts

Choir Mics - Overhead Mics on stage to pick up the choirs and singers in the musicals (these were not yet being used during this year's musical)

Monitors - Speakers to be used in the auditorium and with the music department sound system for the A Cappella groups and jazz bands. Monitors face the performers, so they can hear a mixed sound.

Antenna for Existing Microphones - To boost the signal for our current receiver for microphones that were currently being used that are FCC compliant.

We couldn't have made this generous donation without the help of everyone who donated to the Music Boosters and the Music Boosters Masters fund. We are very fortunate to have such generous and supportive families in our program. We are so appreciative of your support!
